Adidas Sales Dashboard - Report Guide

Insights, recommendations and reporting guide | Prepared from the dashboard by Taiwo Ajayi

1. Key Insights

1. **Healthy profitability:** a 37% operating margin on about $900M revenue.
2. **2021 growth:** monthly revenue in 2021 is several times higher than in 2020, so the growth story is the headline.
3. **Seasonality:** summer (peaking in August) and year-end are the strongest periods.
4. **Geographic concentration:** the West leads with about 30% of revenue; the Midwest is the largest opportunity.
5. **Retailer concentration risk:** West Gear, Foot Locker and Sports Direct deliver about 72% of revenue, while Amazon and Walmart are small.
6. **Channel mix:** in-store is the largest channel and online the smallest (27%), which suggests room to grow digital.
7. **Product mix:** Men's Street Footwear is the top category and Women's Athletic Footwear the lowest.
8. **Weekly rhythm:** sales build toward Thursday and Friday.

2. Recommendations

- Stock and promote ahead of the July-August and December peaks.
- Strengthen presence in the Midwest and South with targeted retailer deals.
- Reduce dependence on three retailers by growing Kohl's, Amazon and Walmart.
- Invest in the online channel, which holds only 27% of revenue.
- Review women's athletic footwear pricing and marketing, as it is the weakest category.
- Time campaigns and replenishment to land before Thursday and Friday.

3. Issues to Fix Before Publishing

Issue	Fix
Chart titled "Revenue per product per gender (male)" lists women's categories and its six values sum to about $901M (total revenue)	Filter to Men's categories only (209M, 154M, 124M) or retitle it "Revenue by Product"
"Revenue per Day" values (146,683 etc.) sum to about 900K, so they appear to be in thousands	Add units ($K) or convert to millions to match other charts
Mixed number formats (242.96M, 95M, 146683)	Use one format, such as $0.0M, everywhere
"Total sales per months" typo; month labels skip some months	Rename to "Total Sales per Month" and show all 12 labels
Sales Method legend order and colors are hard to match to slices	Add category names to the data labels
Line chart legend overlaps the plot area	Move the legend above or beside the chart

Issue	Fix
No YoY or profit-by-category views	Add profit by region and retailer, plus a YoY % card
Slicers are cropped (Product, City)	Widen them or use dropdown slicers

4. Report Narrative Template

Executive summary: Adidas generated $899.9M in revenue and $332.1M in operating profit (37% margin) across 9,648 orders in 2020-2021. 2021 sales were far stronger than 2020, with peaks in summer and December. The West region and three retailers (West Gear, Foot Locker, Sports Direct) drive most of the revenue.

Suggested report sections:

1. Executive summary
2. Objectives and scope
3. Data and methodology
4. Overall performance (KPIs)
5. Time analysis (monthly, year over year, weekday)
6. Geographic analysis (region, city)
7. Retailer and channel analysis
8. Product and gender analysis
9. Insights and recommendations
10. Limitations and next steps

5. Presentation Walk-Through (2-3 minutes)

1. **Headline:** $900M revenue, 37% margin, 9,648 orders.
2. **Trend:** 2021 outperformed 2020, with a summer peak.
3. **Where:** West leads; Charleston and New York top the cities.
4. **Who:** three retailers carry the business.
5. **How:** in-store and outlet dominate; online is the opportunity.
6. **What:** street footwear and women's apparel lead the products.
7. **Action:** the recommendations in section 2.

6. Next Steps

- Add a YoY growth KPI and a retailer-by-month heatmap.
- Add profit by region, retailer and product.
- Add targets or benchmarks to judge performance.

7. Portfolio Checklist

- [ ] Fix the issues in section 3
- [ ] Add a project summary and the business questions to your portfolio page

- [ ] Include a data dictionary and the measure definitions
- [ ] Publish the dashboard (or a short screen recording) and link the source file
- [ ] Write 3-5 insight bullets under the screenshot
